1. Network Database Table : Created the Network Database table to maintain network-related data in a structured and organized manner.

< Catalog Item Network Request

Copy Try It Update Edit in Catalog Builder Delete

Catalog Items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies.

- Enter a Name and Short description to display for the item.
- Enter a Price, approvals, variables, and other information as needed.

4. Service Details : Configured the Service Details section to capture specific network service requirements, enabling accurate request processing and assignment.

5. Flow Designer Configuration : Designed and configured an automated workflow using Flow Designer to process network service requests. The flow captures catalog request

details, creates a record in the Network Database table, sends email notifications, and initiates the approval process automatically.

This screenshot displays the 'Network Request' form within the Service Catalog. The form is titled 'Network Request' with the subtitle 'Network Request Management'. It includes a 'Request Information' section with fields for 'Requester' (Nayomi Palepogu), 'Phone Number' ((709) 340-3488), 'Email ID' (23jr1a0593@kitsguntur.ac.in), 'User Name' (Nayomi Palepogu), and 'Proof of Document' (with an 'Upload' button). A dropdown menu asks 'Is this a new network connection or relocation?' with 'New' selected. On the right, there is a 'Quantity' field set to 1, a 'Delivery Time' of 2 Days, and buttons for 'Add to Cart', 'Save as Draft', and 'Order Now'.

This screenshot shows the 'Order Confirmation' modal dialog box overlaid on the 'Network Request' form. The modal has a title bar with a close button. It contains a 'Request for' dropdown menu with 'Nayomi Palepogu' selected. Below this are two optional checkboxes: 'Delivery Information (Optional)' and 'Special Instructions (Optional)'. At the bottom right of the modal are 'Cancel' and 'Checkout' buttons. The background form is dimmed, showing the 'Type of Devices' as 'Laptop' and a 'Submitting...' status.

Search Catalog

Q

Submitted : 2026-08-02 06:32:31

Request Number : **REQ0010011**

Requested for : Nayomi Palepogu

Estimated Delivery : 2026-08-04

Item	Delivery Date	Stage	Price (each)	Quantity	Total
Network Request	2026-08-04	Assess or Scope Task	---	1	---
					Total: £0.00

6. Output – Service Portal : Users submit the Network Request form by entering the required details. After clicking **Add to Cart** or **Order Now**, the request is successfully created, a Request (REQ) and Requested Item (RITM) are generated, and the workflow is triggered automatically.

7. Email Notification:After the network request is successfully created, the system automatically sends a confirmation email to the user. The email includes the request details and confirms that the request has been received successfully.

8. Preview Email : Previewed the email template to verify the subject, recipient, and message content before sending the notification. This ensures that users receive accurate and professional email communication.
