

Customer Journey Map

User Persona

Primary User: Employee requesting network-related services through the ServiceNow portal.

Journey Stage	User Actions	User Experience	Pain Points	System Opportunity
1. Identify Need	User realizes a network service is required (new connection, relocation, device support).	Wants a quick solution.	Doesn't know where to raise the request.	Provide a centralized Service Catalog.
2. Access Portal	Opens the ServiceNow Service Portal.	Expects an easy-to-use interface.	Searching for the correct request form may take time.	Organize services into categories for easy navigation.
3. Submit Request	Fills the Network Request form with required details.	Wants the form to be simple and accurate.	Missing or repetitive information can delay the request.	Use auto-populated fields and mandatory validations.
4. Request Processing	Request is submitted to the Network Team.	Expects timely processing.	No visibility into current request status.	Automate routing, approvals, and notifications.
5. Request Completion	Receives confirmation after the request is completed.	Expects a quick resolution.	Delayed communication from the support team.	Send status updates and completion notifications automatically.
6. Feedback & Improvement	Reviews the service experience.	Wants continuous improvement in support.	Feedback is not always collected.	Enable feedback collection and service analytics.
