

Empathy Map Canvas

User Persona

Primary User: Employees requesting network-related services through the ServiceNow portal.

Says

- "I need a quick and easy way to raise a network request."
- "I want to know the status of my request."
- "The request process should be simple and user-friendly."
- "I don't want to send multiple emails for the same issue."

Thinks

- "Will my request reach the correct support team?"
- "How long will it take to resolve my request?"
- "Is all the required information submitted correctly?"
- "Can I track my request anytime?"

Sees

- Manual request handling through emails and calls.
- Delays in processing network requests.
- Different request formats causing confusion.
- Lack of visibility into request status.

Hears

- "Please send another email with more details."
- "Your request is still under review."
- "The Network Team will contact you shortly."
- Feedback from colleagues about delays in request processing.

Pains

- Slow response time.
- Repeatedly providing the same information.
- Difficulty tracking request progress.
- Delayed issue resolution.
- Lack of communication during the request process.

Gains

- Easy online request submission.
- Faster request processing.
- Better communication with the Network Team.
- Real-time request tracking.
- Improved user experience through a centralized ServiceNow portal.
- Reduced manual effort and improved service efficiency.
